The Atlas Copco Guardian Service Plan

7 years of worry-free production in 7 steps

1

Contact an Atlas Copco Air Expert

... and invest in a new compressed air installation. Atlas Copco engineers and our nationwide network of distributors are experts in the design, installation, and tailoring of compressed air systems to suit your exact requirements.

2

Enable the FREE 7-Year Warranty

... when backed up with a Guardian service plan. There is no catch. 7 years free warranty - no hidden costs, no excess charges and no previous claim penalties.

3

Choose the Guardian Service Plan for you

... either 7 years, or extend up to 9 years. The plan covers the entirety of your compressor room, not just the air compressor, and ensures your production has maximum uptime at the lowest possible cost.

4

Choose from 2 Guardian Options to suit your needs

... our Guardian service plans include all regular preventive maintenance over 7 up to 9 years with genuine spare parts, oil, all labour and travel, breakdowns and overhauls covered depending on the service plan option chosen. By relying on scheduled service visits, spare parts availability and maintenance, in accordance with the manufacturer's recommendations, you minimise the risk of production disruptions and unforeseen expenses. Guardian keeps your compressed air system running at optimum performance and in the most energy efficient way.

5

Get connected with Remote Monitoring Software

... Smartlink takes you one step further into Industry 4.0 by implementing predictive maintenance. Imagine, instead of our engineers visiting when your compressor needs a repair after overheating repeatedly, they give you a call when your compressor shows the first signs of trouble. Guardian is not just a service plan, Guardian is a predictive maintenance solution that aims to give you the best possible uptime.

6

Plan your Maintenance Budget

... for 7 up to 9 years with set costs upfront. Guardian guarantees your operating budget, avoiding any surprises. It takes the burden of stock or administration away from you, and puts it into our hands instead.

7

Do what you do best

... and enjoy 7 years of worry-free production when your compressor room is covered by Guardian.
